OMICRON Lab Bode Analyzer Suite

OMICRON Lab publishes the Bode Analyzer Suite, the control software for the Bode 100 and Bode 500, on its own website. Download the current version here:

https://www.omicron-lab.com/downloads/bode-analyzer-suite

The Bode Analyzer Suite runs on 64-bit Windows 11. The download page also carries a Linux package with the Bode SCPI Server, for using the Bode 100 from a Linux computer, and the SCPI-based VNA LabVIEW driver for the Bode 100 and Bode 500.

Version listed by OMICRON Lab on 14 November 2026: Bode Analyzer Suite 3.52, dated 11 May 2026.

Supported hardware sold by Debug Store: Bode 100 vector network analyser, Bode 500 vector network analyser.

Debug Store, thedebugstore.com. Document dated 14 November 2026.
